Learn more by following instagram.com/pdrparis.

Gina Deave, *School of Allied & Community Health student*
Scrub and Stretch helps NHS (theatre) staff who are at risk of musculoskeletal injuries, or who already are struggling with these injuries, by offering Pilates classes that are accessible, affordable, and personalised to the unique, physical demands of their work.
Learn more by emailing ginadeave@gmail.com.

Kelly Gilloran, *School of Business student*
Reset Your Path offers keynote talks, 1-to-1 coaching, online courses, and a membership community designed to help young adults struggling with mental health and addiction, and to support them in rebuilding their lives by providing practical tools and frameworks rooted in lived experience.
Learn more online at www.kellygilloran.com.

South Bank Ignite 2026 Finalists

Jeanie McLaren, *School of Health & Social Care student*
Streamline helps individuals who want to enjoy streaming without losing control of their time, attention, and well-being by providing a calm, TV-guide-style interface that brings content from different platforms into one structured space, with limited options, no autoplay, and natural pauses built in.
Learn more by emailing e.jeaniemclaren@gmail.com.

Mehrad Monfarednia, *School of Engineering graduate*
Marshal Language Academy helps individuals struggling with language barriers by offering trained, AI-tailored English sessions and mentorship, featuring career integration, human empathy, and generational awareness to bridge the gap between language fluency and academic or career success.
Learn more online at marshallanguageacademy.com.

Amir Reza Moogouei, *School of Business student*
Quiet Living helps students and remote workers struggling with urban noise pollution by providing real-time acoustic intelligence, including a live noise map, quiet-route navigation, and a directory of "Calm-Certified" cafes and workspaces, helping users find tranquillity in a noisy city.
Learn more by emailing amirrezamoogouei1993@gmail.com.

Jawad Mubashwir, *School of Computer Science student*
Nostradamus AI is a voice-first AI life coach that helps ambitious individuals become consistent with their goals by listening, tracking behaviour through integrations, and turning daily reflection into real-time accountability, in order to bridge the gap between intention and action.
Learn more by emailing j.mubashwir@gmail.com.

Kian Nazari Nouri, *School of Business student*
SolMate is a natural energy drink for individuals who want sustained energy without the crashes, jitters, and high sugar of traditional energy drinks, by using yerba mate to provide a smoother, low-sugar energy boost with strong cultural roots and storytelling.
Learn more by following instagram.com/sipsolmate.

Logan Putt, *School of Built Environment student*
Mileina Kazlauskaite & **Samuel Putt**, *co-founders*
GRABCART helps business owners who understand that their office workers, gym goers, and warehouse operatives struggle with food satisfaction by offering fully tailored vending machines designed and stocked to meet their food and drink needs.
Learn more online at grabcart.co.uk.

Zahra Saboorian, *School of Business student*
ManageHex helps busy London restaurants and event venues struggling with peak-service chaos, disconnected tools, manual reporting, and poor profit visibility by offering a browser-based operations system for QR ordering, payments, staff workflows, live dashboards, and event mode.
Learn more online at managehex.com.

Karen Williams, *School of Allied & Community Health student*
PEICST (People Exploring Ideas Create Something Tangible) is a social commerce value-trading platform where diverse communities can trade anything of equal value—goods, services, skills, and time—instead of money, helping bridge the inequality gap.
Learn more by emailing info@peicst.com.
